ABSTRACT

This survey of voluntary giving to education emphasizes the national picture, the survey picture, and details of support by participating institutions. Highlights indicate: (1) The total voluntary support of the institutions of higher education in 1971-72 is estimated to have been $2.020 billion, an increase of $160 million; (2) all categories of colleges and universities reported increases in support in 1971-72 except private professional and specialized schools; (3) the overall gain in voluntary support of higher education was dominated by increased foundation support; (4) nearly two-thirds of the increase in voluntary support of education was designated for capital purposes, including endowments; (5) there was a slight decline in support received in the form of bequests, but deferred gifts rose 70% to a new record; and (6) the private secondary and elementary schools that took part in the survey reported 12.5% more voluntary support than was reported by such schools in 1970-71. PREFACE

The *Survey of Voluntary Support of Education, 1971-72,* is the 13th in a series of studies in educational philanthropy conducted by the Council for Financial Aid to Education since 1954-55. The American Alumni Council in 1965-66 and the National Association of Independent Schools in 1967-68 became co-sponsors of the Survey in an effort to produce a single survey of voluntary giving to education with the broadest possible coverage.

Institutional participation in this 1971-72 Survey was higher than in any previous year, a fact which the sponsors of this undertaking interpret as an indication of the growing value of these reports both to the academic community and the general public. An analysis of the participation record appears in the Appendix on page 65.

The definitions used in the 1971-72 Survey are the same as those used in 1970-71. Voluntary support, as defined in *Gift Reporting Standards,* excludes income from endowment and other invested funds as well as all support received from Federal, state and local governments and their agencies; in editing the questionnaires, the CFAE deleted all income from these sources when so identified by the reporting institution. Any enrollment figures not supplied by the colleges and universities were taken from the *Education Directory, 1971-72,* published by the U.S. Office of Education.

Since 1965-66, the Survey information has been processed by electronic computer, and most of the data supplied by the participating institutions have been stored on magnetic tape. The ready availability of this store of information makes it possible to undertake supplementary studies of educational philanthropy in accord with any expressed interest in the subject.

The data in this report are the result of countless hours of work by many individuals. To all those who filled out the questionnaires, to the institutions they represent, and to the cooperating associations in the educational community, the AAC, the CFAE, and the NAIS would like to express their deepest gratitude.

Highlights

HIGHER EDUCATION

New Record Set. The total voluntary support of the institutions of higher education in 1971-72 is estimated to have been $2.020 billion. This represents an increase of $160 million, or 8.6%, over the $1.860 billion estimated for 1970-71, and a new record high.

Private Colleges and Universities Show Largest Gains. All categories of colleges and universities reported increases in support in 1971-72 except private professional and specialized schools. Other private institutions generally did better than the public colleges and universities, and the four-year institutions did better than the two-year institutions.

Foundations Pace Givers. The overall gain in voluntary support of higher education was dominated by increased foundation support. Gifts and grants from individuals, business corporations, and miscellaneous sources increased moderately while the support received from religious denominations decreased slightly.

Capital Giving Up. Nearly two-thirds of the increase in voluntary support of education was designated for capital purposes, including endowments. In terms of specific applications, the largest increase was recorded by funds earmarked for faculty compensation; unrestricted giving also increased appreciably and rose in relative importance.

Deferred Giving Rises. There was a slight decline in support received in the form of bequests, but deferred gifts, which had declined substantially in the previous three years, rose 70% to a new record. The value of college and university endowment funds continued to rise sharply.

The number of colleges and universities participating in the Survey was 1,093, a new record high. However, the trends and other comparative findings are derived primarily from the analysis of questionnaires received from 880 institutions of higher education that took part in both the 1970-71 and 1971-72 Surveys.

PRIVATE SECONDARY AND ELEMENTARY EDUCATION

Second Highest Total Recorded. The independent schools that took part in the 1971-72 Survey reported 12.5% more voluntary support than was reported by such schools in 1970-71. All of the increase was due to greater support by individuals and foundations; gifts received for current purposes rose more percentage-wise than capital gifts.

The National Picture

HIGHER EDUCATION

The 1971-72 Survey elicited responses from 1,093 colleges and universities; this is the largest number of institutions ever to participate in this endeavor. They reported a total of $1.647 billion of voluntary support, some 9.5% more than was reported by 1,080 institutions of higher education for 1970-71. A slightly smaller increase, 9.2%, was reported by a group of 880 colleges and universities that took part in both the 1970-71 and 1971-72 Surveys.

On the basis of a comprehensive analysis of the patterns of Survey participation and the reported information regarding voluntary support by source and purpose, the CFAE estimates that the total voluntary support of all 2,626 institutions of higher education in 1971-72 amounted to $2.020 billion. This is an all-time record high for such support, and it represents an increase of 8.6% over the $1.860 billion estimated for 1970-71. As indicated on the accompanying chart, the voluntary support of higher education has almost doubled since 1962-63.

In terms of the sources of support, most of the overall gain in 1971-72 was accounted for by increased foundation giving. The estimated total of foundation support of higher education increased roughly 21% to a level of about $525 million; this exceeds the level of foundation support in any previous year by a very significant margin. The estimated totals also reflect increased support from college and university alumni, from business corporations, and from miscellaneous sources. The total amount received from non-alumni individuals was virtually unchanged from 1970-71, and the support attributed to religious denominations decreased by roughly 3%.

As indicated in the accompanying table, the growth of total voluntary support in the past five years has been only about half as fast as the rise in total institutional expenditures. Such expenditures have increased as a result of both a rise in enrollment and a rise in the educational costs per student. Voluntary support of higher education has risen roughly parallel to the growth in student enrollment, but it has not increased fast enough to offset the additional impact of either general inflation or the rise in expenditures per student.

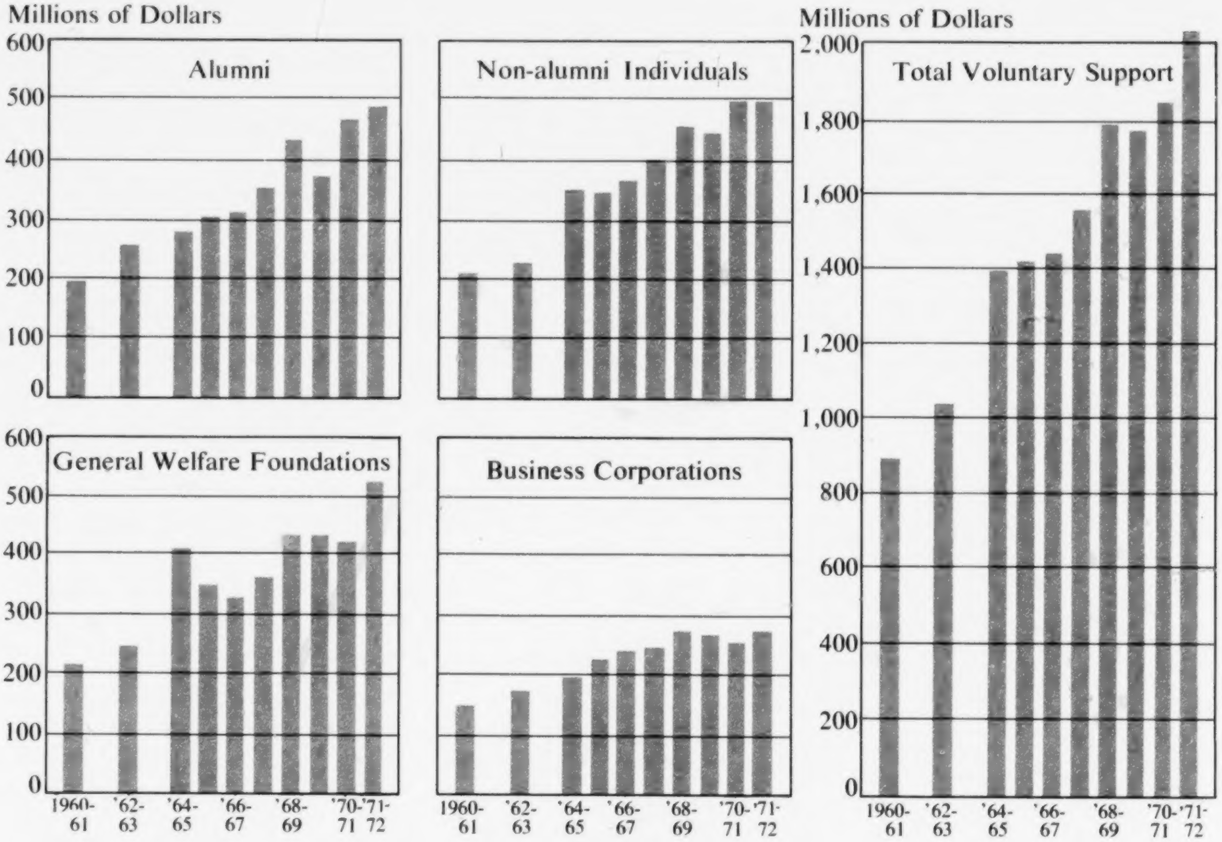
ESTIMATED TOTAL VOLUNTARY SUPPORT OF COLLEGES AND UNIVERSITIES AND SUPPORT BY MAJOR SOURCES



PRIVATE SECONDARY AND ELEMENTARY EDUCATION

No comprehensive estimates are available regarding the voluntary support of all independent secondary and elementary schools. There are, however, three indicators of the trend of such support. (1) The 340 schools that took part in this Survey reported a total of $98.0 million of voluntary support, which is 12.5% more than the $87.1 million reported by 332 schools for 1970-71. (2) Of the 340 schools that participated in this Survey, 245 of them also participated in the 1970-71 Survey, and for this group of schools the year-to-year increase in voluntary support amounted to 13%. (3) The NAIS conducts an annual statistical survey of its members' operations; it reports that 575 schools received $122.1 million in gift income in 1971-72, 13.5% more than the $107.5 million received by 554 schools in 1970-71.

HIGHER EDUCATION

Voluntary Support, by Reporting Institutions

With the exception of the private professional and specialized schools, all categories of colleges and universities reported significantly more support in 1971-72 than in the previous year. However, the senior institutions generally did better than the two-year institutions. Among the four-year colleges and universities, 63% of the public institutions posted increases; the corresponding figure for private institutions was 57%.

The accompanying tables give the experience of the reporting colleges and universities, by category, for 1971-72 in comparison to 1970-71. Excluding the professional and specialized schools, the 557 private colleges and universities in the 880-institution sample reported 11.6% more support in 1971-72 than in 1970-71. About half the dollar gain was accounted for by the major private universities. This group of 57 institutions, which reported a 10.3% increase in support, received over 55% of the total support reported by all four-year private colleges and universities and 43.5% of the total support of all 880 institutions. Nearly 90% of the dollar increase posted by these universities is attributable to greater foundation support; a lower level of bequests resulted in a slight decrease in alumni support.

* Figures shown differ slightly from those published in the 1970-71 Survey Report; 18 institutions have been reclassified and the amount of support reported by them in 1970-71 has been allocated to the class in which they reported in 1971-72.

The only class of institution not to show an increase from year-to-year is the private professional and specialized schools. Although much of the decrease in voluntary support to this group of schools is accounted for by a single, non-recurring gift to one institution in 1970-71, nearly three-fifths of the schools in this class that reported in both years had decreases in overall support. As indicated in Summary Table II (p. 62) virtually all the decrease was due to a decline in support received from individuals; corporations, churches, and foundations increased their support of this class of institution.

For the fourth year in a row, the public colleges and universities reported significant gains in voluntary support, and the total increase over 1967-68 now exceeds 50%. These institutions received 10.1% more support in 1971-72 than in 1970-71, mostly from non-alumni individuals, general welfare foundations, and miscellaneous sources.

Among all the colleges and universities reporting, public and private, the 20 institutions reporting the highest totals of voluntary support in 1971-72 were:

Voluntary Support, by Source

The overall gain in voluntary support of higher education was dominated by increased foundation support. Gifts and grants from individuals, business corporations, and miscellaneous sources increased moderately, while the support received from religious denominations decreased slightly.

As indicated in Tables 3a and 3b, the increase in foundation support of higher education was substantially greater than the increase from any other donor category. Although the increase in support from foundations amounted to over 25% for all institutions reporting, the year-to-year gain for the 880-institution sample was only 21.4%. Although every category of four-year colleges and universities reported increased support from foundations, the largest increase, both in dollars and in precentage terms, was reported by the major private universities. In terms of purposes, the largest increase in foundation support was for physical plant; such designated support rose 54.3% over the 1970-71 level. Foundations also gave more on an unrestricted basis and for all other purposes except for faculty compensation.

Educational support received from the business community increased by more than 5%. This rise in business support completely offset the slight decrease reported in 1970-71. For all institutions taking part in the Survey, the total voluntary support from corporations was a million dollars higher than in 1969-70, the previous record year. Most of the increase in business giving was reported by the major private universities; the private coeducational colleges received slightly less from this source in 1971-72 than in 1970-71.

The voluntary support received from individual donors was generally higher, by roughly 5%, although the pattern of increase differed widely among the various classes of institutions. The major private universities reported a decrease in alumni support, primarily as a result of fewer bequests, and a slight increase in support from non-alumni individuals. The private men's, women's, and coeducational colleges received significantly more from individuals, both alumni and non-alumni. The private professional and specialized schools reported less support from both groups. The public institutions of higher education received about 4% less support from their alumni but substantially more from other individuals, much of which reflected an increase in bequests. The two-year institutions posted an increase of 66.7% in their alumni support. (See Summary Table II, p. 62).

For all colleges, universities, and pre-college schools taking part in this Survey, there was a significant increase in alumni contributions to Annual Fund appeals. Although the number of donors rose by only 0.5%, which is less than the increase in the number of reporting institutions, there was a 15.8% increase in the dollar amount of alumni gifts. The size of the average gift, therefore, increased by more than 15% to a record level of $66.54. The proportion of alumni solicited who responded with one or more Annual Fund gifts was 17.1%, down slightly from 1970-71 and well below the levels of previous years.

* It should be noted that the 1968-69 figure for total alumni giving includes one non-recurring gift of $40 million.

Voluntary Support, by Purpose

Nearly two-thirds of the increase in voluntary support of education was designated for capital purposes, including endowments. In terms of specific applications, the largest increase was recorded by funds for faculty compensation; unrestricted giving also increased appreciably and rose in relative importance.

Total voluntary support designated for capital purposes, including endowment funds, increased in 1971-72 by more than support for current operations, and it accounted for 63.2% of the dollar increase in total support.

The relative importance of support for current and capital purposes varies greatly from one class of institution to another as well as among the various categories of donors. As indicated in the tables below, support received for current operations is most important for public colleges and universities, while capital support tends to dominate the pattern for private institutions. Foundations, corporations, and religious denominations give more for current operating purposes, while individuals tend to prefer capital gifts.

Technical Notes:

A. In the listings on the following pages, Column 22 does not purport to show the total operating expenditures of the reporting institutions; it excludes the operating costs of dormitories, dining halls, student stores, and other "auxiliary enterprises" as well as all outlays of a capital nature.

B. In some instances the number of institutions listed is greater than the number tabulated, for three reasons: (1) some multicampus institutions are shown in summary as well as in detail, (2) some of the component professional schools of major institutions are also listed separately, and (3) a few of the institutions not supplying complete information or reporting too late for computer tabulation are listed.

C. There were 139 institutions responding to the Survey invitation which are omitted from the tabulated data. These institutions include those which (1) were unable to supply any information, (2) received no support, (3) were unable to supply complete information, or (4) reported too late for computer tabulation. These institutions are listed separately on page 72.

of equal significance. The total amount reported by any one class of institution from any one class of donor is subject to erratic behavior due to major fund-raising , large bequests and other non-recurring influences. This is particularly true of the smaller groups of institutions and the smaller dollar figures.

Bequests, Deferred Giving, and Endowment Funds

There was a slight decline in support received in the form of bequests, but deferred gifts, which had declined substantially in the previous three years, rose 70% to a new record. The value of college and university endowment funds continued to rise sharply.

Voluntary support received from individuals in the form of bequests decreased 4.4% from $266.0 million in 1970-71 to $254.3 million in 1971-72. The dollar total of bequests amounted to 15.4% of the grand total of voluntary support in 1971-72, which compares with 17.6% in the previous year. As a share of the total support received from individual donors, bequests accounted for 31.9%, the third highest level in the past ten years.

Total support in the form of annuity trusts, life income contracts, insurance policies, and other forms of deferred giving amounted to $51.2 million in 1971-72, some 70% more than had been reported in 1970-71. This amount constituted 6.4% of total support received from individuals, the highest percentage figure since 1967-68.

Forms of Individual Giving as a Percentage of Voluntary Support by Individuals

Year	*Bequests*	*Deferred Giving*	*Year*	*Bequests*	*Deferred Giving*

1966-67	25.5%	6.1%	1971-72	32.0%	6.4%

The endowment funds of the colleges and universities reporting these figures continued to increase in value, and at the end of 1971-72 were at an all time high both in book values and market values:

Year	*Book Value*	*No. of Institutions*	*Market Value*	*No. of Institutions*
1966-67	$ 8,200,435,609	971	$ 9,879,205,044	810

1969-70	9,730,278,868	977	9,199,401,044	882
1970-71	9,421,470,510	1,007	11,325,350,815	918
1971-72	10,962,858,685	1,020	12,988,170,314	946

As indicated in the table, not all institutions in the Survey have been able to report endowment information; however, the number able to do so is rising steadily.

PRIVATE SECONDARY AND ELEMENTARY SCHOOLS

The independent schools that took part in the 1971-72 Survey reported 12.5% more voluntary support than was reported by such schools in 1970-71. All of the increase was due to greater support by individuals and foundations; gifts received for current purposes rose more percentagewise than capital gifts.

The 340 independent pre-college schools that took part in the 1971-72 Survey reported $98.0 million in voluntary support, some $10.9 million, or 12.5%, more than had been reported by 332 schools in the previous year. The respondents include 245 schools that took part in both the 1970-71 and 1971-72 Surveys; for this group, the year-to-year increase amounted to 13.0%. From an independent statistical survey of its members' operations, the NAIS reported that 575 schools received $122.1 million in gift income in 1971-72 as against $107.5 million received by 554 schools in 1970-71, an increase of 13.5%.

The 10 schools reporting the highest totals of support in 1971-72 were:

PHILLIPS EXETER ACADEMY (N.H.)	$3,054,977
ST. MARK'S SCHOOL (MASS.)	2,118,428
LAWRENCEVILLE SCHOOL (N.J.)	1,843,146
KENT SCHOOL (CONN.)	1,834,737
CULVER MILITARY ACADEMY AND SCHOOLS (IND.)	1,799,188
DEERFIELD ACADEMY (MASS.)	$1,769,612
ST. PAUL ACADEMY AND SUMMIT SCHOOL (MINN.)	1,716,484
NORTHFIELD MOUNT HERMON SCHOOL (MASS.)	1,656,077
HILL SCHOOL (PA.)	1,654,898
PHILLIPS ACADEMY ANDOVER (MASS.)	1,425,217

For all schools reporting, the overall increase is entirely attributable to higher levels of support from individuals and foundations; support from corporations, churches, and miscellaneous sources declined. Among the two groups of individual donors, the alumni donors expanded their support by more, 17.7%, than nonalumni donors, 11.6%. Although foundation support increased by nearly one-third, it continued to be small in relation to individual support.

The private schools normally receive more support for capital purposes than for current operations. In 1971-72, however, gift income for current operations rose 16.6% while capital gifts increased only 10.6%. Support received in the form of bequests decreased 9.7% in dollar amount, and in relation to total individual gifts declined from 10.7% in 1970-71 to 8.4% in 1971-72.

The endowment funds of the independent schools reporting this information continued to grow:

Year	*Book Value*		*Market Value*	
1969-70	$414,468,294	(276 schools)	$405,235,494	(253 schools)

Since the status of many institutions has changed over the years, the data by category is not strictly comparable from one Survey to another.
